**Aim and Scope:**

ICT for Regional Development" (TICDev), University Hassan II of Casablanca (UH2C) Morocco & National Research University "Moscow Power Engineering Institute"(MPEI)- Federation of Russia organize International Conference on Renewable Energies, Power Systems and Green Inclusive Economy (REPS & GIE-2018) in partnership with "Research Centre on Valorization of national Materials for the Protection of the Environment by Optimizing the Couplings of Renewable Energy Technologies and Treatment Processes of Water and Industrial Effluents"-UH2C and Research Centre GreenTIC-UH2C on 23-24 April 2018, CASABLANCA - MOROCCO. Following the success of the two previous editions of the international colloquium "Renewable Energies and Green Jobs" as well as its interest to the scientific community and its impact on the promotion of renewable energies and in particular their impact on implementing green inclusive economy and sustainable development, the scientific and organizing committees have decided to transform it into an international conference. The main objective is to select and present recent trends and progress in the field of renewable energies and power systems and the impact of these research fields on the creation of green economy at local and global scales. It is also a great opportunity to share the experiences and strengthen the networking and collaboration between academia and industry. It is also a step ahead through the implementation of Morocco commitments at COP 21 and COP22, as well as the related commitments that have been declared and acted upon by the majority of global political decision-makers.
